Architectural Solutions

We add function and style to streetscape and commercial construction developments.

Streetscape Applications

Asphalt and concrete are functional surfaces but they are dull and boring. Our streetscape products give you the power to transform these surfaces into aesthetically appealing spaces.

Commercial Developments

Our stunning stone and glass floor finishes offer a unique alternative for interior projects such as foyers, showrooms and retail environments.

Patented asphalt imprinting and coating process that produces realistic brick, slate, stone and other effects .

INTERIORS

A pure stone finish for interior applications overlaying concrete or timber floors

Leading edge surfacing system to add colour to asphalt and concrete surfaces.

A crushed glass system for stunning highlights on exterior and interior floors

High quality thermoplastic technology for durable horizontal signage on asphalt or concrete

EXTERIOR

Exterior projects such as outdoor entertaining areas, entrance ways and public spaces will benefit from the warmth and beauty of natural stone and the vibrant colours of natural glass.

A bold stone finish for exterior concrete or asphalt overlays

A crushed glass system for stunning highlights on exterior and interior floors

A high porosity surfacing system for efficient drainage of surface water
